### **Jayhawk File Express Selected Employer of Excellence**

More than 550 looked on as Jayhawk File Express was honored May 13 as an Employer of Excellence during the Topeka YWCA's 21st annual Leadership Luncheon at the Ramada Hotel and Convention Center.

The luncheon recognizes area women and employers who have demonstrated outstanding leadership, dedication, commitment and excellence at work in the community. This year's theme was "Celebrating Leadership Growing Strong Together."

"Jayhawk File Express empowers women employees by providing opportunities to advance their knowledge and skills," president and CEO Cheryl Creviston said. "Teams within the company work closely together, achieving high performance while maintaining high morale. Belonging to and participating in professional organizations is encouraged and supported. There are four generations of women working at JFE and each brings unique skills and abilities to enhance the whole."

As the government continues to regulate the confidentiality and safe guarding of sensitive information, Jayhawk File Express continues to seek solutions for its customers. "Our suite of services - hard copy record storage, document imaging, document destruction, off-site data protection and web repository - complement each other to provide solutions to meet the demanding regulations, HIPAA, FACTA, Sarbanes-Oxley and Gramm-Leach Bliley," Creviston said. "Our ability to combine record storage with document imaging services creates significant value for customers. When a file is requested, we can hand deliver the file to the customer's location, or we have the ability to electronically transfer the file safely and securely."

As customer needs have increased, Jayhawk File Express has grown to accommodate them. “Our staff has doubled since 2006 to accommodate an average annual revenue growth rate of 40%. I am thrilled to be able to provide jobs for those in our community,” Creviston said. “We now serve more than 500 customers in northeast Kansas. We even have clients who have chosen to consolidate their record storage from all over the U.S. to our facility in Topeka”. The company assists customers with file retention schedules, disaster recovery planning, as well as compliance with industry regulations.

In order to provide the safest, most secure services available, Jayhawk File Express is AAA certified by the National Association for Information Destruction; and belongs to other industry related organizations - the Association of Records Managers and Administrators and The Professional Records & Information Services Management Association.
